? 가 ▾

- The heat-conduction maximizes energy efficiency
- STS 304 frame of corrosion resistance
- Built-in dispenser of detergent and rinse aid
- Free from detergent contamination by fixed wash arm (for S-type only)
- 1.2kW of high powered wash pump
- Visible door window to check working status
- 430mm of door clearance (optional)

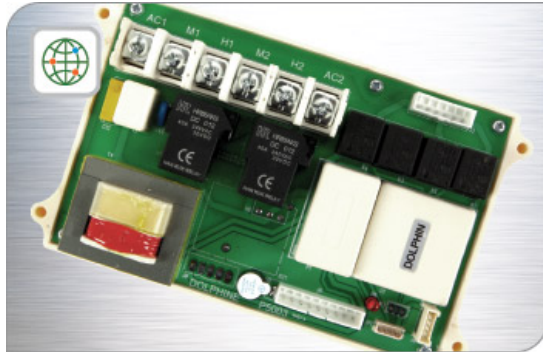

## REMOTE CONTROLLER

Remote controller is not interrupted by installed position even in corner installation. User can read operating stage and upcoming process through FND easily.

You can set each cycle by sec. and total running number. The test mode programmed can diagnosis working status of each part on the controller.

## PCB

The modularized PCB designed by Dolphin reduces malfunction ratio and provides the optimal washing sequence. All procedure is controlled by its MICOM.

Safety lock, self-diagnosis function is programmed and the cycle is changeable according to using environment.

## ★Patented

### BUILT-IN BOOSTER

Built-in booster tank provide the effective heat conservation and highly practical space use. And it makes operating cost down by reducing thermal losses.

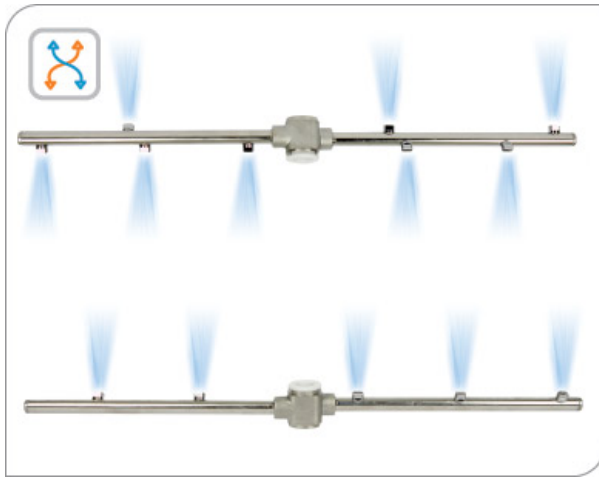

The heat-conduction between booster and wash tank maximizes energy efficiency (for 3000 & 5000 series).

## ★Patented

### JET-BEAM WASH ARM

3D jet-beam spray nozzle is designed for the optimal spray angle and actualizes strong washing efficiency like waterfall shower.

**★Patented**

## ROOF RINSE NOZZLE

The up-ward rinse nozzle cleans detergent residual out of hood roof. Thus it prevents re-contamination from detergent dropping on dishes.

Dolphin dishwashing machine is free from re-contamination of detergent after whole washing cycle.

### Reagent test

## BUILT-IN DISPENSER

Dolphin provides built-in dispenser of detergent and rinse aid for all model, therefore user do not need to install dispenser additionally.

Dolphin dispenser is designed for the supply volume of chemical agent adjustable and changeable easily by remote controller according to food type. The supply quantity is automatically controlled at each stage by MICOM.

## STRONG WASH PUMP

1.2kW and 1.5kW of the high-powered wash pump designed by Dolphin assures clean and hygienic washing result.

Dolphin wash pump made of harmless high-strength plastic, is resistant to corrosion and provides pleasant kitchen surrounding with low noise

 Patented

## SUPER(S-TYPE) WASH ARM

The Dolphin new technology, fixed wash arm makes dishes clean from detergent residual. The vane of full cone nozzle and the square washing zone enables water spray to eliminate the blind spot.

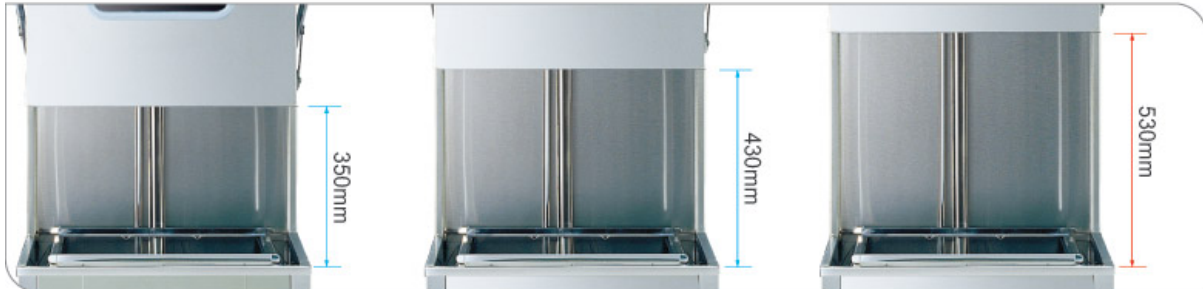

Full cone nozzle

## HIGH CLEARANCE HOOD (Option)

According to special purpose, Dolphin diversifies the model line-up and provides expanded door clearance models up to max. 530mm. (for 3000 and 5000 model)

The high clearance hood is usable for big dishes or food tray as well as industrial mold ; it's adaptable for industrial washer. Therefore the applicability is improved extraordinarily.

**Patented**

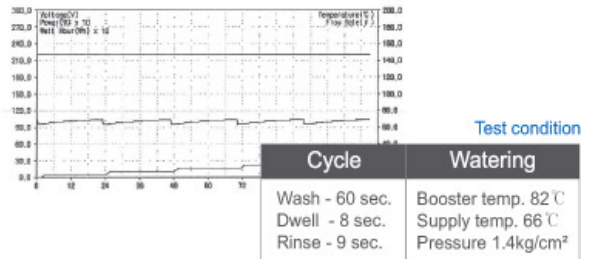

### ENERGY SAVING DEVICE (Option)

E/S device recovers the waste heat from drain water by heat-conduction. It makes washing capacity improved by reducing the energy consumption, heating time.

Dolphin E/S device reduces about max. 20% of total energy and 40% of electric energy consumption and saves the running cost.

Temperature test

## ENERGY SAVING DEVICE (Option)

### Standard

### Option

Model	Wash Arm	Dim. (mm)	Door Clearance (mm)	Weight (kg)	Power Supply	Used Power (kW)	Pump capacity (kW)		Heater (kW)		Tank Capacity (L)		Wash Capacity	Dispenser	E/S Device
							Wash	Rinse	Tank	Booster	Wash	Rinse			
3210i	i TYPE	W : 650 L : 650 H : 1355	350 (430 option)	89	220V 1PH	4	1.2	0.13	-	2.8	40	27	25-73 Racks/HR	Detergent & Rinse Aid	Optional  Equipped
3210S	S TYPE				380V 3PH	9.2			8						
3280i	i TYPE				13.2	4									
3280S	S TYPE				13.2	4
